How many words do you need to speak a language?

So which words should we learn? Prof Webb says the most effective way to be able to speak a language quickly is to pick the 800 to 1,000 lemmas which appear most frequently in a language, and learn those.

If you learn only 800 of the most frequently-used lemmas in English, you'll be able to understand 75% of the language as it is spoken in normal life.
